DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to anticipate or make obvious the structure of claims 1-9 and 14, including, *inter-alia*, measuring a pulse wave with a pressure sensor, a unit for acquiring a direct current component of a pressure wave, and means for detecting a stable direct current site and defining an optimum pressurization force.

Oka (US Patent Application Publication 2002/0161305) discloses a pulse wave measuring apparatus with a pressure sensor and a unit for defining an optimum pressurization force.

Goto (US Patent 6527726) discloses a blood pressure monitoring apparatus that acquires a direct current component of the monitored signal for use in further analysis and monitoring.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

2. Applicant's arguments, see remarks filed 1 December 2006, with respect to claims 1-9 and 14 have been fully considered and are persuasive. The rejection of claims 1-9 and 14 has been withdrawn.
